

Understanding Preservation Issues within Wilderness Areas

Case Study: Olympic National Park

Ahlstrom's Prairie, 2011

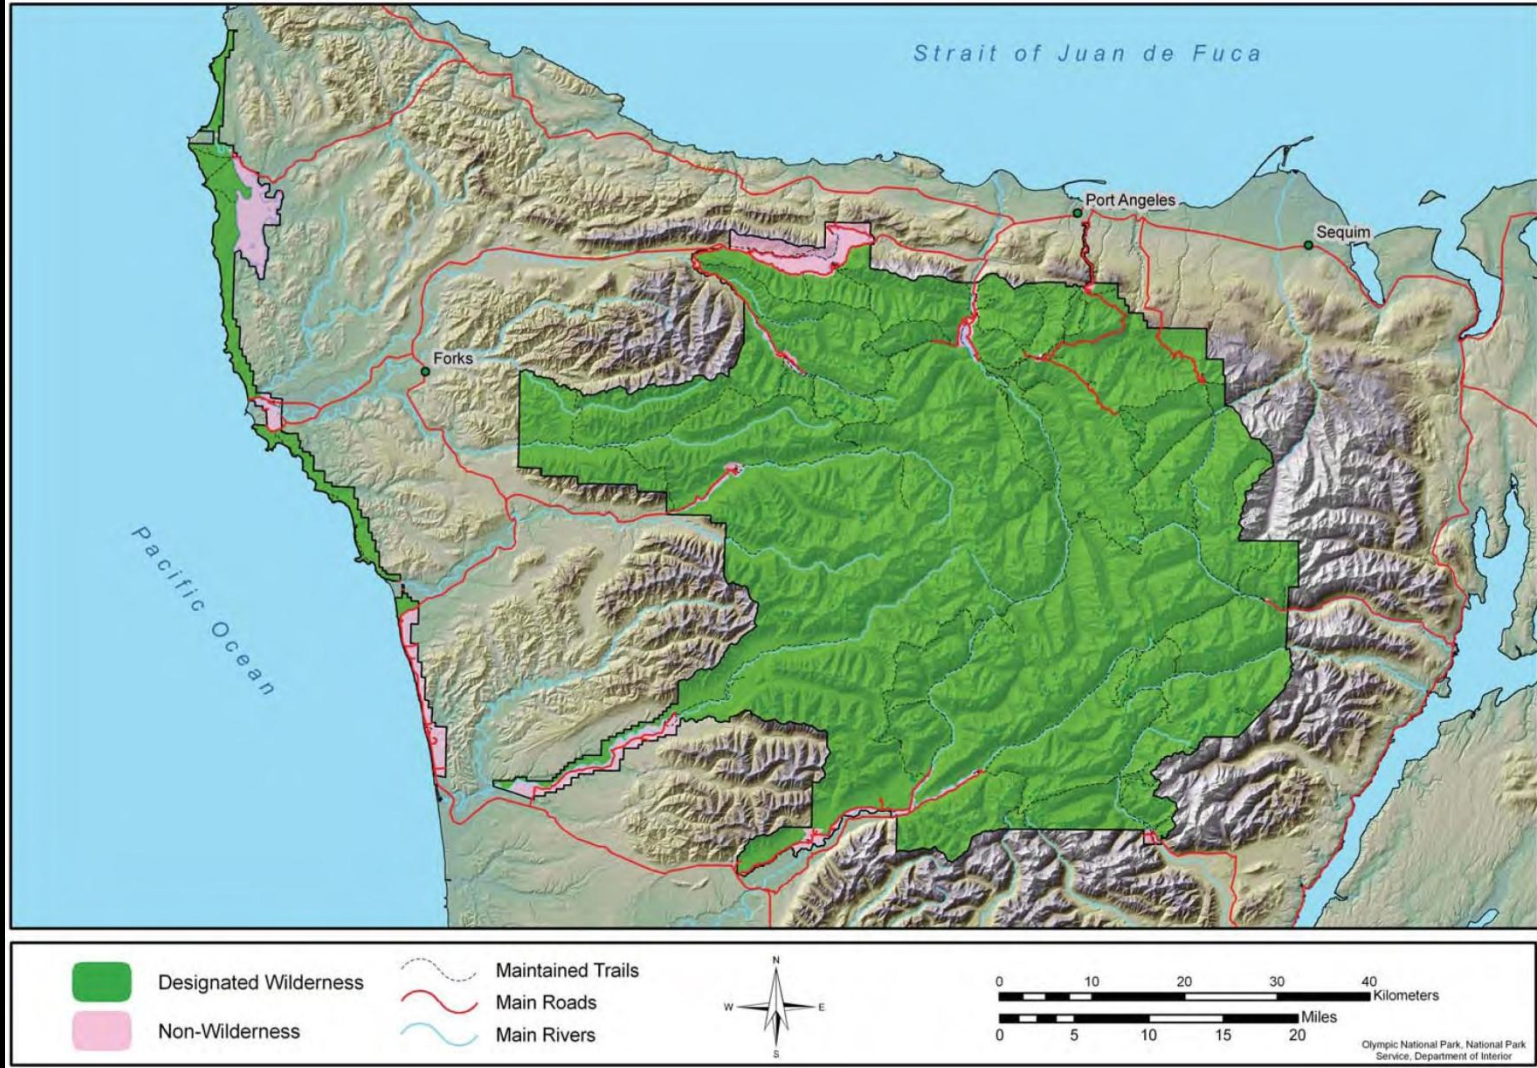

Olympic National Park Wilderness

- Congress designated the “Olympic Wilderness” in 1988
- Olympic National Park has 876,669 acres of wilderness, which constitutes 95% of the park. It contains:
 - 611 miles of trail, 700+ bridges, 12 miles of boardwalk, 6 ranger stations, historic shelters and homestead sites, privies, and 1,300+ campsites as well as administrative facilities such as radio repeaters and research equipment

Questions to Consider

- How do we find balance between preservation of cultural resources, natural resources, and wilderness values?
- What is the appropriate level of treatment for cultural landscapes and historic buildings and structures in wilderness?
- Will the “primitive qualities” of the landscape be lost with the “presence of human control”?
